

1 Abstract of the Disclosure

2 A work garment for use by gardeners, roofers or others to protect their clothing
3 while working and for holding articles in pockets, which may be changed by snapping on
4 special pockets for different uses of the garment. The pockets can be of different sizes
5 and be segmented or not for holding different articles. The garment may have permanent
6 and snap-on pockets. The garment is fastened around the waist of the wearer by a belt
7 and the legs fastened by straps around the wearer's legs. Kneepads in kneepad pockets
8 protect the wearer's knees and make working more comfortable while kneeling. The
9 garment extends from the waist to just below the knees for a lightweight easy to put on
10 and easy to take off garment.
